Description:

This anthology explores theories and pedagogical practices that seek to graduate global leaders who are culturally astute, intellectually alert, technologically creative and innovative, and ethically

sound. In Part I, the contributors examine the tasks of helping students develop a voice, an identity, and a sense of mission in their writing. Part II explores the teaching of literacies in the areas of science, technology, engineering, and mathematics (STEM); literacies necessary for creating competitive visionary leaders in the marketplace. Part III showcases methods of instruction that teachers draw from histories, literature, social sciences, and American cultures in particular and global cultures in general. In Part IV, the contributors offer teaching strategies not only in critical-thinking skills, but also in imaginative, creative-thinking skills to prepare visionary leaders to create solutions and products to meet the needs of the world's population and marketplaces.
