Description:

There is a split right down the middle of modern medicine. One half, boosted by dazzling high technology, shows brilliant results in handling acute diseases and emergencies. The other half, dealing with chronic degenerative conditions, is lagging behind, unable to offer more than

symptomatic treatment for the most widespread distressing conditions ranging from cancer, heart disease and hypertension to diabetes, arthritis and morbid obesity. It is assumed that these and other "diseases of modern civilization" are both inevitable and incurable. Healing the Gerson Way: Defeating Cancer and Other Chronic Diseases contradicts all such assumptions. As a complete guide to the theory and practice of the Gerson Therapy, developed over 80 years ago by Dr. Max Gerson, MD (1881-1959), it shows that the increasingly denatured, nutritionally empty, toxic modern diet is the main cause of today's worsening health crisis. This book offers the solution in the form of a brilliant, precision-built nutritional program that eliminates the underlying causes of disease, leading to lasting cures. This program is best known for its success in curing many types of cancer, but it also has an excellent track record with a large number of other degenerative conditions.
